

Rules and Contract

Version 5.7.4

The object outlined below is now considered to be owned property.

The object agrees, as a consenting adult of sound mind, to follow the rules contained in this document.

This agreement will fully take affect when Master places his permanent mark of ownership on the slave. This could consist of tattoos, brands, tags, piercings, chains, collars and any other mark of ownership. Until that time the property must follow the rules contained in this document fully but will be given a single opportunity to comment on the contents 24 hours prior to the ownership mark being applied. These comments will be considered but may not be acted upon, however after receiving its mark of ownership the property loses any right to comment on these rules and agrees to follow any additions or changes its owner subsequently makes fully and without question.

SLRN/Property ID

Definitions

These definitions provide clarification of some terms used in this document and by the object's Master. They are also a reference to language the object should be using when it refers to itself.

- i* **Master, Sir, Boss, Owner** – [Name redacted]
- ii* **faggit, slave, faggot, 000-100-110, property, object, cunt, it** – the undersigned object formerly known as Matt and now owned by [Name Redacted] with the registration number 2672 000100110
- iii* **Bed, pen, kennel** – Any area designated as a sleeping area.
- iv* **Short term** – Under 24 hours
- v* **Medium term** – Between 1 and 7 days
- vi* **Long term** – More than 7 days
- vii* **Extended period** – 1 month upwards
- viii* **Piss tube** – Penis, something the object should get no pleasure from. It is there for it to piss through and Master to torment, torture and control the object with
- ix* **Fuck hole, cunt** – anus, for Master's pleasure and to torment, torture and work on.
- x* **Tits** – Nipples, another area to torment.
- xi* **Suck hole** – Mouth, for Master's pleasure

Golden Rule

The object will complete all tasks, activities and duties given to it by its Master or his representatives so long as they are legal and will not cause permanent harm to the slave.

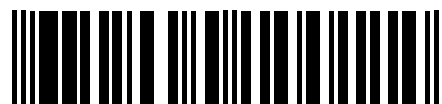

1 General

- 1.1 The object exists purely to serve, work and suffer. As such the object has no opinion, no rights and no option other than to obey or suffer the consequences and penalties laid down by its owner for any disobedience or failure, no matter how minor.
- 1.2 The property may be given 'encouragement' to finish the tasks, duties or activities it is given. This encouragement could take the form of pleasure, pain, humiliation or something completely different as Master sees fit.
- 1.3 The object may be tethered/chained to objects or areas for long periods so that it can focus on the completion of tasks, duties or activities.
- 1.4 The object is likely to spend quite a bit of time in pain or discomfort, it consents to this and understands that it will not be expected to complain.
 - 1.4.1 The object will be expected to carry out any activities, tasks, chores or duties set during, before or after any pain or discomfort is being administered.
- 1.5 The object understands that as well as being inferior to other life, it is also inferior to anything else owned by Master and as such will treat Master's property with respect and care.
- 1.6 The object will ensure it is always prepared to be used by Master or Master's proxy. This includes ensuring it is always clean inside and out and its holes fully lubricated.
- 1.7 The object will maintain an appropriate diet and fitness regime to obtain and maintain an appearance pleasing to Master.
 - 1.7.1 This may include:
 - *starvation*
 - *over-eating/force feeding*
 - *intense periods of forced activity*
 - *intense periods of forced inactivity*

Rules and Contract (version 5.7.4)

- 1.8 The object will be respectful towards Master, other dominants, Master's friends, other slaves and everyday people but not draw attention to its position as owned property or to Master's as owner.
- 1.9 The object will never question or disagree with Master in public and in private. It is up to Master to ensure all situations are appropriate & for the object to follow orders.
- 1.10 The property has no privacy, both physical and mental. When in the presence of Master, the object will make sure that there are no barriers, such as closed doors, between Master and it.
- 1.11 The object is to live a tortured life and as such is to seek out the least comfortable way to live and additional ways to always torture, humiliate and degrade itself in addition to anything Master does to it.
- 1.12 The object will live in accordance with the guides presented in this document and will adopt a "Master first, other people and objects second, it last" approach in everything it does where the property is uncertain what it should do.
- 1.13 The object will have its behaviour, attitude and actions corrected if its Master feels it has made a mistake in the interpretation of these rules and guides by not putting Master first, even when Master is not present.
- 1.14 The object will be kept disease and drug free. Smoking and drinking are not permitted unless ordered by Master.
- 1.15 The object may be required to continue to work in its current job, change jobs or careers or stop working altogether in order to best serve its owner.
- 1.16 The object will be given suitable reading, viewing and listening material as Master sees fit. It will not consume any other media other than that provided to it.
- 1.17 As far as the object is concerned, it has no name. It is a number - 000-100-110. It may only use its legal name for work or official purposes. Master may choose to change its legal name to anything he wishes via deed poll. He may also refer to the object via a given pet name (currently faggit) should he wish to. The object is never to use this name to refer to itself.

2 Development

2.1 The object understands that at times the situations it is put in may mean that it is subject to permanent or temporary physical changes.

2.1.1 For example, these could include but are not limited to:

- *changes in the way it walks*
- *pumped/inflated genitals*
- *gaping or ruined arse or cock holes*
- *speech restrictions* ● *markings*
- *clothing it is permitted wear*

2.1.2 Some of these physical changes will require the object to adopt regular routines and practices in order to maintain them. It is up to the slave to follow any order in this respect, as necessary. In periods away from Master the object will be expected to find its own methods of maintaining the appearance Master requires

- *For example, if Master wants it to have permanently inflated balls, the property may be subjected to regular saline infusions. It will be expected to carry these on when away from Master.*

2.1.3 where any physical changes are made the object understands that it will be able to hide these with work clothes. This is to protect Master's revenue stream but may be expected to display them with pride in other situations.

2.2 The faggot understands that, along with physical attributes, its behaviour may be modified. it will not be expected to complain about this & the object will need to carry out any activities, tasks, chores or duties as normal.

2.2.1 Behaviour modifications could include, but are not limited to:

- *Making it wet the bed.*
- *How it feeds.*
- *Its attitude towards others.*
- *Its behaviour and interaction with others.*
- *The object's eagerness to serve sexually.*
- *The speech it uses.*
- *The way chores are carried out.*

2.3 The object is to always be the best it can be for Master. As such, certain areas may need to be developed more than others.

Rules and Contract (version 5.7.4)

- 2.3.1 These areas will change over time depending on Master's tastes and needs.
- 2.3.2 The slave agrees that it needs to be as useful to its Owner as possible and as such consents to being developed in any way its Master wishes.
- 2.3.3 Sometimes the development regime may be very intense.
- 2.3.4 Areas that Master may wish to develop could include, but are not limited to:
- *anal capacity*
 - *gagging reflex*
 - *resistance to pain*
 - *humiliation tolerance*
 - *working speed*
 - *choosing clothes that please Master*
 - *removing limits*

2.4 Master may use automated devices to control and develop his property. These will be left on until Master removes them. They are never to be removed or adjusted by the object in any way.

- 2.4.1 Automated devices may include but are not limited to devices that inflict a shock, constantly vibrate, fuck machines, masturbators or other instruments that inflict pain, pleasure or both on the object.
- 2.4.2 The object understands that Master will set safe limits on what these devices do but that they may be left attached to the object and turned on when it is unattended by Master or for extremely long periods, sometimes well in excess of 24 hours.
- 2.4.3 The object understands that these devices may be used in public situations, such as at restaurants or when it is shopping. They may be automatically turned on remotely or when the slave meets a certain condition such as straying outside a defined area
- 2.4.4 The object agrees to receive any number of shocks, pain or pleasure in these circumstances & understands that they are being used in line with Master's wishes.

3 Positions & accessing the object

3.1 The object has 8 main positions to use & will adopt them on order. Where no order is given the default position should be adopted:

3.1.1 Default/At ease:

The object stands, feet apart to the width of the shoulders – arms behind the back, holding one wrist with the other hand. Head should be slightly lowered.

3.1.2 Attention:

The object stands, feet and ankles together, almost touching. Arms are at the sides, fingers curled slightly under and held at the thighs. The object maintains a formal posture, with the back straight. Eyes are open & focused on the horizon. The object is not allowed to move or shift its gaze.

3.1.3 Head up:

As default position except head is up with hands behind head, one on top of the other.

3.1.4 Kneel up:

This position is the same as standing to “Attention,” only the object does it on the knees.

3.1.5 Kneel Down:

The object kneels with knees far apart, resting back on the heels. The back is straight and the hands rest on the thighs.

3.1.6 Available: like kneel down except the object tilts the head back, closes the eyes and opens the mouth.

3.1.7 Presenting:

The object is down on all fours with the forehead touching the floor, legs slightly apart making sure its arse hole is clearly visible. Slave should use a variation of this position for eating.

3.1.8 Sitting:

The object sits on the floor, knees bent and apart with feet on the floor. Hands on the floor behind the back.

3.2 The object will make its arse, cock, balls, mouth, feet and nipples available to its Master or anyone else its Master orders it to at any time. If any of the following orders are given, the object should take the corresponding actions before remaining still:

3.2.1 Arse/cunt/fuck hole:

Any jeans/shorts/trousers etc that are being worn should be pulled down to just below the base of the arse. The object should then either place his forearms on his forehead and lean against a wall with his face touching it sticking his arse out or bend over something of appropriate height as available. If neither option is available, the object will adopt the 'presenting' position above.

3.2.2 cock/piss tube/balls:

The object will undo any flies and buttons on his trousers and stand in the 'at ease' position above, pushing its hips forward. Under no circumstances will The property remove its cock or balls from its trousers without further instructions. If tracksuit bottoms or other clothing without buttons/zips are being worn the object will pull them down so that they are positioned behind its balls before standing at ease.

3.2.3 Mouth/suck hole:

The object will simply adopt the 'Available' position above.

3.2.4 Feet:

The object will remove anything from its feet, lie on the floor face down, legs together and feet in the air.

3.2.5 Nipples/tits:

buttons on shirts should be undone, zips on tracksuit tops down or the front of t-shirts placed behind the neck. The object should then stand at ease.

3.3 The traditional Low/Medium/High protocol does not work well in a modern society because of the number of variables involved. Levels of protocol can be too rigid and do not allow the object to always serve in the best way it can. As such the protocols and actions above are the only protocols the object will have. The property will always follow them but may adapt them subtly for each situation. For example, if Master indicates that he is bringing a colleague home for dinner the object may choose to greet Master at the door as normal but suitably clothed, standing, head still bowed with a "welcome home Boss". If the object gets it wrong, it will be rewarded with a corrective punishment.

4 Relationships

- 4.1 The object understands that its Master may wish to have more than one slave, faggot or object. The object will only have one Master.
- 4.1.1 The object understands that even these slaves, faggots and objects will be of higher status than it.
- 4.1.2 The object understands that any additional parties could act on behalf of Master or Master may wish to use this object along with others owned by Master for various tasks or scenes.
- 4.2 The object understands that its Master might wish to have more than one sexual Partner, regular or otherwise. The object may be shared with these partners in any way its Master desires or may be forced to watch its Master with these partners.
- 4.3 The property is not permitted to seek sexual pleasure from anyone or anything other than its Master unless a 3rd party has been given use of the object by its Master.
- 4.4 The object will be allowed to maintain a permanent relationship with its immediate family, as set out in the communication section below.
- 4.5 The object will form no other relationships, sexual or otherwise with anyone other than Master unless Master has ordered it.

5 Communications & interaction with others

- 5.1 Master has the right to inspect all SMS texts, emails, letters and any other correspondence, personal or otherwise, sent or received by the object. Communication may be recorded.
- 5.2 The object is not permitted to have mainstream social media accounts or third-party messenger apps of any kind, other than a single account to view but pictures its sister in Australia posts. It will not interact on this account, just view posts.
- 5.3 Master will create, maintain & control profiles on sites that are appropriate for his needs with regard the object.
- 5.3.1 These will include BDSM site profiles and other sex or role specific sites.
- 5.3.2 Face pictures will not be shared on these sites.

5.4 Verbal communication should always be kept to a minimum. If it really needs to initiate verbal communication with Master the object should raise its hand and wait for Master to acknowledge it. If it is impossible for the object to do this, it is permitted to gain master's attention in another respectful way.

5.4.1 In private or in a safe place, such as a fetish club, the object will only speak when all below conditions have been met:

- *Master has removed the objects head harness/muzzle/gag.*
- *Master is squeezing its balls.*

5.4.2 In public, the object will only speak if one or more of the below conditions has been met:

- *It has been spoken to first.*
- *It would be rude for the object not to speak.*
- *When it is absolutely required to in order to complete duties.*
- *When Master has given it permission to speak freely.*

5.5 All communication, written, verbal or physical will be considerate and show the object's submissive nature. It will be polite and respectful.

5.5.1 When speaking with its Owner the following terms should be used.

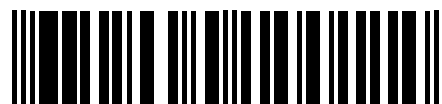

- *Master – a default term used in private or safe locations.*
- *Boss – to be used where appropriate in public.*
- *Master's first name – to be used when other options are not appropriate.*
- *Animal noises only – when involved in animal role-play.*

5.5.2 Orders should always be confirmed with a "Yes Master/Boss" and "Thank you Master/Boss" should be used very frequently.

5.5.3 In private the object should always refer to itself in the third person using the terms 'faggit' or 'the cunt'. For example, *"The cunt would like to thank you Master. it is grateful for the punishment."*

5.6 The object should only speak or interact with other master's if it has permission from its own Master.

5.6.1 All interaction will be polite and as if speaking with its own Master but using the term 'Sir' instead of 'Master'.

Rules and Contract (version 5.7.4)

- 5.6.2 If several masters are present the object should look at whichever he is interacting with to indicate which he is communicating with. It may be necessary to refer to them as “*Sir [last or indicated name]*”.
- 5.6.3 Interaction with other slaves/objects/faggots etc. should be adapted to the individual situation and another master’s hierarchy should be respected. *The object should be aware that all hierarchies are slightly different structures.*
- 5.6.4 If another Master has a hierarchy in place the object should consider itself lower than the lowest slave in that hierarchy. Other slaves should be referred to as “slave [first name]” unless told otherwise.
- 5.7 All questions must be answered openly and honestly.
- 5.8 The object may maintain contact with immediate family and friends in line with the relationships section above. This will be done in the following way:
- 5.8.1 The object may make a minimum of one phone call or visit to its parents per week. Phone calls will always be on speaker phone & Master will remain silent throughout.
- 5.8.2 It may be allowed to ‘buy’ additional calls and visits at master’s discretion by giving up one of its allowances (such as a meal), using reward points or submitting to extra extreme punishments. The purchase cost is to be set by Master and will fluctuate.
- 5.8.3 The object will be allowed to make up to one phone call to one of its friends or to its Sister per month. It is up to the object which one it chooses.
- 5.8.4 Additional calls to friends may not be purchased, however one additional call to its sister can be purchased at Master’s discretion in return for 5 punishments of Master’s choice; to be carried out directly after each other.
- 5.8.5 The object may visit its family for a period of 14 days per year or in an emergency but will be expected to carry out tasks and activities while away. It will receive an extreme punishment on its return. Visit days do not have to be consecutive but must be agreed with Master.
- 5.8.6 It may be allowed to ‘buy’ additional visits at master’s discretion by giving up some of its allowances (such as a meal) or submitting to extra extreme long-term punishments.

Rules and Contract (version 5.7.4)

5.8.7 The object's family may choose to visit it. If the object's family should visit, the object will be allowed to give the appearance that it is not owned and of normal status. Master will keep track of how and when it does this in order to administer punishment when they leave.

5.8.8 The object may interact with family and friends at other times only as part of any social time given & with Master's approval.

5.9 The object will be allowed to reply to any emails or texts it receives if they need a response.

5.9.1 Any emails sent must be bcc'd to Master & text messages will be inspected weekly.

5.10 When communicating via the phone to family, friends, call centres or any other party the object should either be edged by Master, be subject to cock and ball torture, be attached to electro sex devices or be fucked with its fuck machine, a dildo or Master's cock.

5.11 When greeting in a Master/slave friendly environment or at home the object should perform the following greetings:

5.11.1 *Greeting its Master:*

- The object should adopt the kneel down position and greet Master with a simple "Good morning/afternoon/evening Master" or "Welcome home Master" before kissing his right foot.
- The object should then tip its head back, eyes to the ceiling and open its mouth ready to accept Master's spit, for which he should be thanked. The object should remain where it is until kicked in the balls, told to carry on or Master leaves the room.
- The same protocol should be adopted when leaving Master's presence for any length of time. the greeting should be changed to "Goodbye Master".
- If kneeling or using the word "Master" is inappropriate these may be adapted.

5.11.2 *Greeting other Masters:*

- Other Masters should be greeted after the objects' own Master but before
 - other members of the public and other slaves.
- The object should stand at ease and say, "Good morning/afternoon/evening Sir" and perform a little bow.

- The object should never greet another Master physically but should accept any physical greeting from the Master with delight.

5.11.3 Greeting other objects/slaves/faggots etc:

- If it is the first time the object has met the slave, it is to respectfully ask the
 - slave's owner (if present) if it can greet the slave in a physical manner.
- If their Master is not present the object should ask the other slave directly.
- The object should establish if it has permission to greet as the slave's inferior (preferred) or equal as other Master's may have different views of their slave's status.
- If permission to greet is granted the object is to hug the slave by putting one arm around the slave and placed on its arse. The object will cup the slave's balls from the front with his other hand. Ears should be touching. No verbal greeting will be exchanged.
- If the object is greeting as the preferred inferior it should then kneel at the slave's side until either the slave moves away, or the slave is instructed to move.
- Other slaves may have different forms of greeting, both physical and verbal and the object should be open and responsive to these.

5.11.4 Dealing with uninvited contact:

- If a different Master or slave speaks to the object without permission, then it must reply "(Sir) it is owned property and as such will require permission from its Master to speak to you".

5.11.5 Greeting the general public:

- Simple, polite, formal greetings should be used where appropriate. Touching or eye contact is never appropriate unless initiated by the other person. In any case it should be as short as possible.

6 Behaviour in Public

6.1 The object should always behave in a polite and respectful way.

6.2 the object should walk slightly behind Master, only moving in front to open doors.

6.2.1 When holding doors open the slave should bow its head and wait for Master to pass through.

6.2.2 the slave will also walk behind other Masters. the object will not however offer any services to them, that is for its Master to do.

6.2.3 On humiliation and punishment tasks the property should walk slightly ahead of Master, remaining in sight always so that he can check on it.

6.2.4 When on a pavement the slave should always walk on the side nearest the traffic

6.3 If Master needs to carry anything the object should always ask if it can carry the items for Master.

6.4 The object will never sit unless given permission to do so and may be required to adopt any of the positions or actions above.

6.5 It is up to Master to decide what a situation requires, not the object.

6.6 The object will never make a decision of its own when in public and Master is present and will follow Master's instructions as always.

6.7 the object may walk with other slaves and should follow instructions given on how to do so (e.g., hold hands).

6.7.1 If another slave is holding the door open the object should stand next to it at ease.

6.8 The slave should not copy other slave's behaviour unless told to do so; just because one slave is behaving in a certain way, for example sitting, does not mean that the object should behave in that way as well.

6.9 Dealings with the general public should be as required and so as not to draw attention to Master or the object.

6.10 The object may use its previous name for work purposes. In public Master will choose what to refer to his property as.

7 Serving in Private

7.1 Master may require his property to spend time off work (while respecting work commitments of his slave in setting dates) locked 24×7 at home with no access to the outside world and to serve as a general houseboy or prisoner, bound for days on end or in any other way.

7.2 If the object is home alone, it should adopt the 'kneel down' position by the door to greet Master on his return.

7.2.1 If on a chain or movement is restricted in another way the object will do this as close to the door as possible to the best of its ability.

7.3 If no orders are given or the object has completed all the tasks given it will return to its storage place.

8 Bathroom use

8.1 The object needs to be reminded that it is not to be treated as an equal to the rest of society. It understands that altering its toilet behaviour is a good way to positively reinforce this.

8.2 To remove the need for the object to stop to urinate and allow it to focus more on serving, it will be catheterised often. This means it will have no control as to when, where or how much it urinates. Diapers and other devices will also be used very frequently and the slave should use these freely as it needs to.

8.2.1 When catheterised; bags/nappies may be used to collect the urine at times and on other occasions the object will just be left to drip out.

8.2.2 Catheters will not be used when the object is at work. If a way can be found to discretely keep the object catheterised while at work without causing its performance to drop Master may extend catheter use to working days as well.

8.3 When in Master's presence on general duties the object must ask permission to urinate if no catheter/nappy etc. is fitted. This request may be granted or denied, and the object should urinate how & where instructed. This may or may not be in a toilet.

8.4 The object should take enemas at 6:00am and 8:30pm. Unless ill, defecation should only take place at these times. The enemas should be of a substance and quantity of Master's choosing.

8.4.1 After each enema, the slave will shoot two shots of lube up its hole before reinserting its plug.

Rules and Contract (version 5.7.4)

- 8.4.2 When at Master's home and if no instructions are given the object should piss on all fours over a bucket. Defecating outside of its allotted times should be done in a similar way but will be punished.
- 8.4.3 It may be required to wipe its arse with its hands and lick them clean as toilet paper is considered a luxury item.
- 8.4.4 If slave is on punishment it may be required to use nettles as toilet paper.
- 8.5 If it needs to go to the toilet when in public or at its home and no specific instruction is given the object should sit in the most uncomfortable position it can. Normally directly on the rim of the toilet facing the rear, chest touching the raised seat and remaining seated for the duration of the flush. The object should lick the rim to clean it after the object has urinated.
- 8.6 On the rare occasion it is instructed to use a urinal the object should ensure that its trousers etc are around its ankles leaving its arse exposed. It should ensure its hands are firmly placed on each arse cheek, spreading them. The object should not touch its cock or chastity device at all, pulling its trousers etc. up immediately after it has finished pissing.
- 8.7 When on tasks Master has designated as high priority tasks, the object does not need to waste Master's time asking permission to urinate. Instead, it should just go wherever it is, whatever it is doing or wearing. the object should not stop doing the task or activity as it urinates.
- 8.8 The object will be required to recycle Master's, its own or other people's piss or fluids in various ways.
- 8.9 Legal pills etc. may be used on the object to encourage urination & toilet use.
- 8.10 The object will always make sure it has licked the rim of the toilet clean after Master has used it. It is a privilege to do this so Master should be thanked.
- 8.11 The object will at times be required to use public or private toilets as a source of drinking or bathing water.
- 8.12 The object will at times be required to serve as a private or public toilet or urinal. It should thank whoever uses it in this way, even when gagged.
- 8.13 the object will be hosed down as Master feels necessary to prevent it smelling of piss.

9 Chastity

9.1 As the object is owned, its owner has the right to secure its genitals in chastity using a device of his choosing and for any period without any reason. As the object has no need to access its genitals and keeping them locked away have proven to be an exceptionally good form of control, the following will apply:

9.1.1 The object will be kept in permanent chastity and only released so that Master can abuse its cock or on exceedingly rare occasions cause it pleasure. It is never allowed to touch its genitals, arse or nipples without permission other than for hygiene reasons.

9.1.2 For health reasons prostate milking and other forms of milking that do not allow pleasure will be used on the object.

9.1.3 If the object should cum or orgasm without permission, even when stimulated, it will receive a minimum of 1 simple, 1 complex and 1 severe punishment as well as a separate extreme humiliation task.

9.2 From the point of entering service the object is forbidden from looking at its cock. To maintain this protocol non-transparent devices will be used. If Master requires access to the object's piss tube, then devices to restrict vision and movement will be used.

9.3 Master may use a variety of chastity devices as he sees fit. The object understands that these may be uncomfortable or bulky. They may change the way it walks or restrict its movement to some extent. The object also realises that some devices may be more noticeable than others under any clothing it wears.

9.4 The object will keep itself clean, well-cared for and will be required to submit to a regular deep clean session by its owner in which it will be bound, gagged and tormented so as not to find the experience pleasurable.

9.5 The object may beg for release if appropriate, but this will be ignored. The object's owner should be thanked regularly for keeping its worthless piss tube in chastity.

9.6 The object's owner is of course entitled to tease it about its chastity both in public and private whenever he feels like it. The object has no right to keep its chastity hidden and its owner may decide to inform or show it off to others as he sees fit.

9.7 Master may inspect any chastity device at any time to ensure compliance.

Rules and Contract (version 5.7.4)

9.8 Except in an emergency, any chastity device may only be removed by Master. Discomfort or chafing etc. are not emergencies but should be reported to Master. He will decide what action is required.

9.9 If the object needs to travel through security, visit the doctor etc. then it must tell Master and agree how any chastity device is to be, temporarily, removed. Activities such as visiting the gym, going swimming etc. do not constitute acceptable reasons for the object to request removal.

9.10 Master may make alterations to chastity devices or the object to improve the security the device provides or just to cause more suffering to the property. The object understands that these may cause discomfort or pain and are not a reason to request removal.

9.11 Any device may be secured in anyway, this includes the use of padlocks, permanent locks, rivets, urethral tubes or piercings as well as other methods.

9.11.1 It may be that a device becomes permanently and irrevocably attached. No matter the discomfort this causes the object should not complain.

9.11.2 Master may stretch any piercings if necessary or this may happen naturally.

9.11.3 Rivets may be used through piercings and the objects understands it is unlikely that any device secured in this way will ever be removable.

9.11.4 Any chastity device fitted should be worn with pride by the property. The object should take no steps to conceal it, including changing at the gym etc. Unless Master dictates otherwise, when in public or the situation does not allow for this the device will be on display, i.e., sticking out through the flies on clothing.

9.11.5 A large, heavy padlock through a piercing may be used in lieu of a chastity cage at times. When this is the case the object should still maintain the protocol of not looking or touching its piss tube at all. If Master suspects in any small way that it has severe punishment and humiliation task will be given.

9.12 Anal chastity may be used by Master. Normally this will be in the form of a locking butt plug. When the object is locked in anal chastity Master will ensure that it is able to use the toilet as required.

10 Finance

- 10.1 If/when the object moves into Master's home it will give up all control of its finances, allowing Master full access to bank accounts to manage this.
- 10.2 Until such time as the object moves to Master's home it will provide full monthly bank statements for him to monitor.
- 10.3 Spending will be kept to a minimum and all purchases over £10 must be approved by Master before they take place; except for petrol, utility bills, mortgage/rent and council tax.

11 Food and Drink

- 11.1 The object may or may not get fed every day and may be required to survive on the minimum needed to keep it alive and able to serve to its full potential.
- 11.2 The object will ensure that Master is always fed first.
- 11.3 Leftovers, scraps from a bin, pet food and baby food are considered a suitable meal for the object. Anything more is a luxury.
- 11.4 The object's main diet will consist of 'kunt mix', 'urinal mix' 'fag mix', 'bitch mix' and 'whore mix'. Recipes will be provided to the slave and may be modified at any time.
- 11.5 At Master's home the object will not use hands to eat and it will eat from a dog bowl unless instructed otherwise.
- 11.6 The object will eat anything at all it is ordered to from whatever it is told to.
- 11.7 When out in public its Master will always order food and drink for the object.
- 11.8 The object will only normally drink water or piss. This will be fed to it in a dog bowl, baby bottle/cup or pet water bottle when at Master's home.
- 11.9 Master may choose to get the object drunk; in this situation the property will drink as much alcohol as Master desires at the speed he chooses.
- 11.10 *At weekends and when not at work the slave will be fed long lasting Viagra as and when it suits Master.*

11.10.1 Master will not normally tell the object it is being fed Viagra. For example, could be concealed in such places as the slave's food or given to it when it is blindfolded.

11.10.2 The object understands fully that this may mean that it is erections are prolonged, at inappropriate times or that its erection is visible either through clothes or when naked. Erections will be uncomfortable, both physically and mentally, especially when it is in chastity.

11.10.3 The object will display any erection proudly and must make no attempt whatsoever to hide it.

12 Appearance

12.1 In order to maintain an appearance in line with its Master's wishes the object should maintain its hair with a cut every 5 weeks. It should ask for a skin fade on the sides and back There should be enough length on top for Master to grip hold of.

12.2 The object should remove all hair from the neck down.

12.3 The object must always wear a symbol of its status, as a leather collar is not appropriate at work Master has agreed that a different symbol will be chosen and permanently fitted.

12.4 Failure to keep appearance in line with the above will result in an appropriate severe punishment.

13 Attire

13.1 **At Master's home or in other Master/slave safe situations** the object will wear the following as standard

- *chastity cage / cock padlock*
- *ball weight and bag to encase its balls*
- *anal plug*
- *status marks (such as collar)*
- *muzzle/head harness/gag*
- *lead*

13.1.2 *Master will decide where to attach the lead each day - e.g., collar, muzzle, Piercing etc. If no instruction is received the slave will attach it to the last place indicated by its Master*

13.1.3 Socks and underwear are never acceptable.

13.1.4 If the situation requires it, for example when visitors are present, the object may remove its muzzle etc. and wear clothing it would normally wear in public. Master will indicate when this is appropriate if present. If Master is absent the slave will be left to decide and report it to Master after the fact.

13.1.5 Master will choose to make the object wear different types of clothing or items such as catheters, nappies, rubber, leather or other fetish gear on his whim, as punishment or for any other reason. The object will not remove anything it has had put on by Master or the object is told to put on until permission has been given by Master. These may be visible, uncomfortable, humiliating or cause pain.

13.2 **In other situations**, it is not always possible for the object to dress in accordance with the above. When this is the case (i.e., in a vanilla setting) the object may wear:

- *chastity device/cock padlock*
- *ball weight and bag to encase its balls*
- *anal plug*
- *status marks (under clothes if appropriate)*

As well as one of the following outfits depending on the situation or Master's orders:

- *Tight black tracksuit bottoms or shorts made of a shiny material or rubber. These should be embarrassingly tight and have pockets cut out where possible. Shorts should be of a pre-approved length.*
- *A shiny top such as a tracksuit top with zip, T-shirt or rubber top.*

Rules and Contract (version 5.7.4)

- *A pair of red trainers.*
- *A lead attached to the slave's Prince Albert piercing and fed through jeans or shorts pocket; over the waistband if there are no pockets.*

OR

- *Tight tapered jeans or black shorts made of either denim or leather. These should be embarrassingly tight and top buttons should always be undone. Pockets should be cut out of denim jeans or shorts. Denim shorts will be cut to an appropriate length by Master; leather shorts must be of a length preapproved of by Master.*
- *A pair of red braces*
- *A black polo shirt*
- *A pair of black boots*
- *A lead attached to the slave's Prince Albert piercing and fed through jeans or shorts pocket; over the waistband if there are no pockets.*

OR

- *Its normal work clothes*

OR

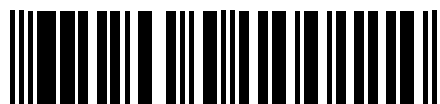

- *When hiding gear that will not fit under normal clothing a pair of loosefitting black coveralls & appropriate footwear are appropriate*

13.2.2 Socks are only acceptable for work (1 pair per week) and underwear is never permitted without a prior order.

13.2.3 Master will choose to make the object wear different types of clothing or items such as catheters, nappies, rubber, leather or other fetish gear on his whim, as punishment or for any other reason. The object will not remove anything it has had put on by Master or the object is told to put on until permission has been given by Master. These items may be visible to those in the know but will be largely undetectable. They may be uncomfortable, cause pain or be humiliating.

13.2.4 When at work ONLY – the object may wear a pouch tied tightly around its piss tube and balls. This is to stop chastity and ball weight rattle if this is an issue.

NB – The object has revealed to Master that it has always preferred wearing no underwear, even when unowned and does not see the lack of underwear as a sign of its inferiority. As such master is in the process of sourcing a single pair of fetish

underwear that will maintain the access to its piss tube, balls and hole Master needs and the object will find humiliating, uncomfortable and will hate wearing.

14 Movement & entering

14.1 On entering Master's home, the following will take place:

- *The object will immediately strip naked in the entrance hall or down to its nappy if wearing one.*
- *It will put on any clothing or equipment laid out for it & follow any instructions left for it.*
- *The object will then adopt the presenting position unless ordered otherwise.*
- *Only once having been abused by Master to his satisfaction and ordered to will the object move.*

14.2 The object will never enter through a closed door into a room where Master is present without permission.

- *To gain permission the object will knock on the door and kneel.*
- *The slave will wait for permission to be granted for the object to enter.*
- *The object will crawl into the room.*
- *If waiting for a new task the object will crawl to master and adopt the 'presenting' position with its lips touching Master's feet and await further instructions.*
- *After receiving a new instruction in this way, the object should kneel up and place its balls in Master's hand for him to briefly abuse as permission to start the task. If in a nappy, the slave should kneel up and wait for master to kick it in the balls as permission to begin.*

14.3 If the object wishes to enter a room where the door is open, but Master is in the room the property may enter without knocking, following the same procedure as entering a room with a closed door.

14.4 If whilst the object is working, Master enters the room the object should stop what it is doing and assume the 'present position' facing away so its testicles and hole are presented towards Master.

- *The object will not move until Master either leaves the room, instructs it to carry on or abuses it before kicking it in the balls as an indicator to carry on.*
- *If Master enters the room and the object has previously been put in a set posture it does not move from that position.*

14.5 If ever the object ever receives the instruction 'kennel' it will lie on the floor spread eagled on its front. Master will then abuse it and stand on its balls as indicator that he is done with it. The slave will immediately crawl to its set sleeping or storage area.

14.6 The object will never close an open door.

15 Sleeping arrangements

15.1 The object will never sleep in a proper bed unless invited to by Master. Its Bed is wherever it has last been told it sleeps. This maybe anywhere indoors or outdoors.

15.2 The object may only go to bed after its Master has given permission to do so. Permission will only be given if the object has performed all its duties for the day and Master has finished with it.

15.3 Master may order the object to bed at any time and the object must go immediately, day or night. For example, if at the cinema the object should go home immediately and go to bed.

15.4 Unless told otherwise, the object should always sleep naked except for its ball weight, chastity cage and butt plug.

15.5 Once at its sleeping place the object should wait for Master to check on it before going to sleep.

15.6 If the object is to share its sleeping space with another slave, it should limit physical contact where possible. If master intends physical contact, then bondage will be used to ensure it is only as Master wants.

15.7 Master may choose to make the object sleep in other things, for example, an item of clothing, nappy, bondage gear or toy. If Master has added anything it should remain on until removed by Master.

16 Storage

16.1 When not being used the object will be kept in storage.

16.2 When in storage it may be left items to use on itself or torture itself with. It will do this constantly until taken out of storage or ordered to sleep.

16.3 The slave may be kept in storage for any length of time Master sees fit.

16.4 The slave may be in bondage or restrained when in storage.

17 Modifications

17.1 As with any piece of owned property, Master may want to make changes to it. Modifications may include, but are not limited to:

- *quick or normal weight loss/gain*
- *muscle growth/loss*
- *speech modification*
- *implants*
- *tattoos*
- *piercings or stretching of piercings*
- *branding*
- *scarification*
- *tongue/cock/ball splitting*
- *ball stretching / implants*
- *beading*
- *castration*
- *modification to clothing*
- *enlargement*
- *corseting*
- *dental modifications*
- *behavioural modification (e.g., through association)*
- *biohacking*
- *any other semi-permanent or permanent modification not mentioned above.*

17.2 RFID chips may be implanted into the object so that Master may track the property, log it or provide information via NFC devices.

17.3 It is recognised that Master will want to supervise any modifications that take place and will instruct the person carrying out the modification on the slave's behalf. The object will remain silent apart from to confirm that it wishes for the modification to be carried out & to give consent. The object will eagerly consent in all cases, even if not aware of the modification beforehand.

Rules and Contract (version 5.7.4)

- 17.4 The object's comfort is not a consideration either when a modification is taking place or as a result of any modification.
- 17.5 Modifications will take place for practical reasons, to enhance the object's performance, to make its appearance more appealing to its Master, to cause the object discomfort or pain in its everyday life, as a source of humiliation for the object or for any reason its owner desires. They may be used to label the object.
- 17.6 The way any modification is carried out is Master's decision. The procedures may be painful or humiliating. Modifications may take place in private or in front of an audience.
- 17.7 The object understands that it gets no say in any modifications to it. The object's opinions, thoughts and feelings will not be considered & should not be expressed.
- 17.8 Dependent on Master's needs, modifications may be temporary, changed over time or permanent & irreversible.
- 17.9 Any modification will not interfere with the object's ability to maintain a professional appearance at work or affect its job in any way. This is to protect Master's revenue stream.

18 Punishment

18.1 Punishments will be harsh, sadistic, humiliating and frequent. They may be considered depraved or sub-human.

18.2 Punishments will be categorised as Simple, Severe or Extreme punishments. All categories may be carried out in private or public at any time that suits Master.

18.2.1 Simple punishments will be given for very minor rule infractions or other very minor issues. For example, unavoidable lateness of under 5 minutes or using the wrong tone of voice when allowed to speak to a member of the public. Simple punishments will consist of a caning, spanking or belting and a small activity related to the rule infraction or issue being dealt with.

18.2.2 Severe punishments will be given for minor to medium rule infractions and other issues. For example, being 5 – 10 minutes late or not asking permission to urinate. Severe punishments will consist of a severe caning, belting, whipping or beating followed by an extended and sadistic or humiliating activity that has been designed to really drive the issue home to the slave.

18.2.3 Extreme punishments will be given for medium to major issues such as being over 10 minutes late, touching its chastity cage without need or having an 'attitude'. Punishments will consist of an extreme corporal punishment element will be designed to be felt for at least a week. A strong psychological element will be incorporated into extreme punishments as a separate element. Extreme punishments will take place over a minimum period of a day.

18.3 The object may be punished if its Master is displeased. Punishment may also be given for no other reason than it pleases the object's Master or to remind the object of its position.

18.3.1 Master really enjoys punishing his slave object. Because of this the slave will receive a minimum of 5 simple punishments 2 severe punishments and 1 extreme punishment per month even if it has behaved in an exemplary way all month. In most months, these figures will be higher.

18.4 When the object is being punished because of something it has done, a reason will be given.

18.5 Punishments will be designed to fit the crime committed. They may take any form including, but not limited to, Corporal Punishment, humiliation, carrying out tasks,

doing something that is not liked, behaviour modification, psychological punishments, confinement, bondage or body modification.

18.6 Some punishments may result in temporary or permanent changes. These could include but are not limited to the object's physical appearance, if it is able to sit or how it is able to move.

18.7 Master may delegate punishment of the object to a 3rd party.

18.8 The object will write down anything it should be punished for on a slip of paper and immediately put it in the punishment pot for Master to act on when he is least inconvenienced.

18.9 After any punishment, the object will thank Master. The object will then take up the "present" position, waiting for Master to re-plug its fuck hole with a plug of his choice if necessary and give it further instructions.

18.10 If any punishment is not complete for whatever reason, the object's fault or not, it will commence from the start again at master's earliest convenience. An additional punishment will be added for the delay.

18.11 Punishment may be carried out in stages over any period.

18.12 Any refusal or disobedience will result in swift severe and sadistic punishment.

19 Rights of the object

19.1 The object will not be subjected to any illegal activity or any activity that places it in danger of death or permanent disability. Although the object benefits from this, the main reason for this statement is to protect Master's legal standing and protect him from arrest. For similar reasons, the object will not subject Master to any illegal activity or any activity that places him in any danger.

19.2 The object will not be placed in any situation that could cause embarrassment to Master and as such anything that could cause either the object or Master to potentially be arrested will be avoided. Situations involving members of the general public who have not consented to this lifestyle will also be avoided for the same reason.

19.3 The property will not be subjected to any situation that will endanger its job or ability to work. This is to protect its income so that it can better serve Master.

19.4 The object has the right to the use of a safe word. It has been decided that this will be “Pineapple”. Master has the right to respect or ignore the safe word. He will often take it as indication to double down on what he is subjecting the object to. It is pointless having it really.

20 Other rights and considerations

20.1 The object’s Owner has the right to expect high standards from the object and for it to act and behave in accordance with its position. He also has the right to make use of the object at any time or place that suits him. Likewise, the object’s Owner has the right to let others make use of the object & the object agrees to be used by others without notice.

20.2 If Master has consented to the use of the object by others, the object should treat and serve them the same way it would do its own Master.

20.3 The object has stated that its limits are needles, dangerous breath control, gun and knife play as well as scat. Master will respect the breath control, gun and knife play limit but considers any other limit to be soft limits and as such has the right to develop the object in these areas. This will be done responsibly so as not to put the object in any danger.

20.4 Master has the right to make money from the object, this could be through pornographic photos or videos, charging to allow others to make use of its services (sexual or otherwise) or by other means.

20.5 Where images or videos are produced the object will be hooded to protect its identity, Master’s privacy and his future income from the object. Master will not share or allow anyone else to share images made unless the object is hooded and Master’s identity is protected for the same reason.

20.6 These rules can be changed, added to or completely rewritten by Master at any time with no prior consultation.

20.7 Master enjoys the slave suffering and has the right to treat it in whatever way he wants to get the most enjoyment from it. Master will not consult the object over anything he plans to do with or to it.

20.8 Master has the right to treat his property in ways that could be considered subhuman and depraved, subjecting it to conditions that he would not consider keeping animals in.

20.9 Master has the right to demand the object carry out some community service. For example, providing for the homeless. Such service could be domestic, administrative, sexual or involve the slave giving up some of its privileges such as meals.

20.10 Master has the right to pass the object onto a future owner of Master's choice and will carry out due diligence to ensure the object is suitable for the Master.

20.11 the object agrees that it is Master's right to restrict and track the slave's life in any of the ways below or in any additional way its Master sees fit. This could include, but is not limited to:

- *Restrictions on when it can go online or log in.*
- *Restrictions to approved sites only.*
- *Restrictions to what computer programs it can load.*
- *Restrictions on how long it spends on the computer.*
- *Tracking websites the object visits.*
- *Tracking what it types on the keyboard (keyloggers).*
- *Tracking of text messages/emails sent and their content.*
- *Recording of any phone calls made.*
- *Tracking its location – including geofencing where it and its Master are warned if it leaves or enters a certain location.*
- *Random (sometimes automatic) camera pictures to prove where it is and what it is doing.*

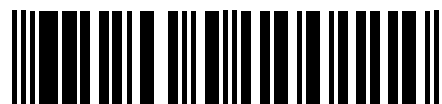

20.12 Master has the right to apply any of the clauses in this document, or any others he decides are necessary at any time and for any length of time. This could be hours, days, weeks, months or years as appropriate.

20.13 Master has the right to allow or deny the object to 'purchase' additional treats and activities by giving up one or more of its allowances, completing tasks, submitting to extra punishments or anything else he sees fit. Master has the right to withdraw these additional treats as he pleases, even once the object has 'paid' for them.

20.14 In summary, Master has the right to do as he pleases and protect his income, lifestyle and property. The object is owned property so has no real rights.

21 Periods of Absence

21.1 During periods of absence, it is expected that these rules will be adhered to.

Rules and Contract (version 5.7.4)

21.2 The object's Master may seek and allow others to make use of the object in any way he wishes during periods of absence.

21.3 Whilst away from Master, anything that may displease him must be disclosed, as must anything he will be proud of.

21.4 Any punishments due may be set and carried out by the object's Master, a 3rd party with his Master's consent or both.

22 Transfer

- 22.1 The object is property. Master may use the object for the purpose of trading or transfer the object to a new Master.
- 22.2 Any trade or transfer may be temporary or permanent.
- 22.3 A trade or transfer could be for any reason whatsoever. Examples include but are not limited to:
- sex
 - domestic
 - office and manual work
 - long or short bondage sessions
 - testing of equipment or methods
 - torment & abuse
 - to serve at an event
 - to serve privately
 - to serve publicly ● to a new master
- 22.4 The object has no say in any trade or transfer & will be severely punished for any lack of performance or disrespect shown.
- 22.5 Anything the object is traded for will remain the property of its Master and the object should not expect to benefit in any way whatsoever.
- 22.6 Master may choose to give the object away.
- 22.7 Although the object considers itself gay, Master sees the object purely as property and as such may allow someone of any gender to make use of or take ownership of it.
- 22.8 The object understands that a new permanent owner will probably want to change these rules, will have different tastes and interests and could treat the slave in a completely different way – either more leniently or harshly.

23 Declaration

Property ID: 000-100-110 agreement

The object formally known as Matt [REDACTED] confirms that it has read and understood

Property ID: 2672 000-100-110

Rules and Contract (version 5.7.4)

this agreement in full. It agrees to follow the rules set out in this contract without question. It understands that this contract will become irrevocable once Master's permanent mark is placed on the slave and at that point the slave will be permanently owned by the undersigned Master with no termination clause for the object to use. It understands that it will never be released by its new Master but ownership of it may be transferred to another party. It understands that this document may be changed or re-written by Master at any time and its signature below is acceptance of all future versions of this document or any documents that replace it. The object understands that failure to follow the clauses in this document will result in additional punishment, humiliation and degradation as well as physical, behaviour & attitude modifications to ensure the object's future compliance. It agrees to serve the undersigned Master fully in any way that pleases him and to submit fully to him.

Signed: [REDACTED]

Date: 18/1/2018

Master's Ownership Agreement

I, [REDACTED] agree to take ownership of the abovementioned property and allow it to serve me in line with the terms of this document and any future or replacement documents. I agree not to permanently injure this property or subject it to anything that could result in death, it being arrested or harm its current or future employment.
